- i** ▶ This tool GOVONI set is a **PATENTED** solution for **DISASSEMBLY** modern hubs with integrated bearing type HBU2 (a pre-assembled unit combining hub and bearing, i.e. the Hub Bearing Unit) without having to disassemble the king pin/hub/bearing unit from the car and placing it on a press.
- 🔧** ▶ **DISASSEMBLY:** it can work on bearings with an external diameter from  $\varnothing$ 62 mm up to  $\varnothing$ 85 mm.
  - ▶ The tool set's modularity consists in its innovative removal semirings **1** the diameter of which can be changed by means of intermediate spacers **2** so as to adapt to the diameter of the bearing to be removed.

- 👉** ▶ The main advantages are:
  - **UNIVERSAL disassembling system** (suitable to all the models).
  - **Use directly on the vehicle.**
  - **Safety use** in assembling/disassembling (no breakage or damage of the hub).
  - **It reduces working time of 25%** compared to common tools.
